

CRISALION Mobility Signs Pre-Sale Agreement with UrbanLink Air Mobility for 20 eVTOLs

US-based UrbanLink Air Mobility chooses CRISALION Mobility's electric aircraft to expand its operations in Europe

Madrid, 04 December 2024 — **CRISALION Mobility**, a Spanish leader in the design and development of advanced electric mobility solutions that are efficient, safe and sustainable, has signed a cooperation agreement with **UrbanLink Air Mobility (UrbanLink)**, a leading South Florida-based advanced air mobility (AAM) and sustainable transportation company. Under the agreement, CRISALION Mobility will pre-sell 20 Integrity aircraft to UrbanLink, highlighting both companies shared commitment to revolutionizing regional air travel through Advanced Air Mobility solutions.

UrbanLink is positioned to be the first independent operator of all electric AAM solutions and is poised to make history as the first non-OEM-owned airline in the U.S. to integrate electric vertical take-off and landing (eVTOL) aircraft into its fleet. The agreement with CRISALION Mobility aligns with UrbanLink's growth strategy, leveraging partnerships with prominent industry leaders to enhance connectivity, efficiency and comfort while delivering a fully integrated sustainable transportation network across air, sea, and ground. By incorporating CRISALION Mobility's eVTOLs into its all-electric fleet, UrbanLink will strengthen its operations in Europe, with a strategic focus on the Spanish and Italian markets.

This new agreement brings CRISALION Mobility's total **pre-sales of Integrity aircraft to 145 across four continents**, cementing the company's position as one of the global leaders in the mobility of the future.

Currently under development, the Integrity eVTOL is designed to carry up to five passengers and a pilot. Its versatility makes it ideal for urban and intercity transport of both passengers and cargo. Equipped with **FlyFree** technology, Integrity maximizes passenger comfort in all phases of flight, providing a high-quality travel experience and significantly reducing emissions.

*"We are proud to partner with Crisalion, one of Europe's most well-funded and expertly managed eVTOL manufacturers," said **Ed Wegel, Founder and Chairman of UrbanLink Air Mobility**. "The Integrity's innovative design, which significantly reduces vibration while optimizing range and speed, is truly impressive. We are excited to bring these aircraft to routes connecting Madrid, Milan, and other major European cities."*

Manuel Heredia, CEO at CRISALION Mobility, said:
"It is an honour to welcome UrbanLink to the CRISALION family of partners. UrbanLink's vision of becoming a fully electric, efficient transport operator is perfectly aligned with our commitment to lead the mobility of the future, driving innovation, quality and sustainability. We are delighted to commit to a strong, lasting partnership, one that will change the way we understand transport."

About CRISALION Mobility

CRISALION Mobility is a Spanish leader in designing and developing advanced electric air and ground mobility solutions which are efficient, safe and sustainable. Created in 2019, CRISALION Mobility has a pioneering dual commitment to electric air and ground mobility, delivering cutting-edge proprietary solutions for domestic and international operators.

Its eVTOLs feature a unique patented technology, FlyFree, which maximises aircraft stability and has been tested successfully on European test flights. On land, its fully-electric, emission-free vehicles feature Intellydrive technology, allowing for the remote operation and management of dynamic vehicle platoons which return automatically to their charging station with the utmost safety and sustainability. CRISALION Mobility is committed to improving people's quality of life and helping to protect the environment with smart air and ground mobility solutions.

About UrbanLink

UrbanLink is a South Florida-based advanced air mobility (AAM) company dedicated to revolutionizing urban transportation – whether by sea, air or ground - through innovative sustainable mobility solutions. Led by aviation industry veteran Ed Wegel, UrbanLink is committed to creating smarter, greener, and more efficient transportation systems that enhance connectivity and sustainability in South Florida and beyond. UrbanLink is positioned to be the first independent provider of all electric AAM solutions and is poised to make history as the first airline in the U.S. to integrate electric vertical take-off and landing (eVTOL) aircraft into its fleet.
